Professional Summary

B.Tech Computer Science graduate (2025) with ~1 year of experience in Java backend engineering and hands-on expertise in AI/ML including NLP, computer vision, survival analysis, and RAG-based LLM applications. Experienced in building REST APIs, debugging production systems, and developing end-to-end ML pipelines. Currently focused on AI Engineering, GenAI systems, and MLOps workflows.

Experience

Assistant Software Engineer

July 2025 – Present

UPCL (via Infinite Sols), Dehradun

- Debugged and optimized production Java REST APIs and microservices supporting power utility operations
- Reduced ticket resolution time through root cause analysis and improved test coverage
- Managed relational databases including query optimization, schema updates, and indexing
- Developed unit and integration tests ensuring API reliability
- Collaborated in Agile teams to deliver backend features

Java Intern

July 2024 – August 2024

IDS Infotech Ltd, Chandigarh

- Developed backend modules in Java within enterprise codebase
- Applied OOP and JDBC concepts in production-level applications
- Delivered features within sprint timelines

Operations Intern

July 2023

UPCL Ltd, Dehradun

- Exposure to SCADA systems, data center operations, and billing infrastructure
- Rotated across operations, finance, and IT departments

Projects

Customer Churn Prediction (ML + Survival Analysis)

- Built end-to-end churn prediction using Random Forest and Cox PH model
- Achieved 77.36% accuracy, 0.84 ROC-AUC, 0.966 concordance index

PDF Summarization + RAG Chatbot

- Built NLP pipeline using HuggingFace and LangChain
- Implemented vector search (ChromaDB) with source-cited responses
- Deployed on HuggingFace Spaces

Crop Disease Detection

- CNN model on 50K+ images, 38+ classes with 88% accuracy
- Built FastAPI inference service and MLflow tracking

NLP Chatbot

- Transformer-based intent classification with context-aware responses
- Achieved sub-500ms latency

Stock Market Prediction

- LSTM-based time series model evaluated using RMSE

To-Do List API

- Built Spring Boot REST API with validation and Swagger docs

Blockchain Voting System

- Developed decentralized voting system using Solidity and Web3

Object Detection

- Real-time detection using OpenCV and YOLO models

Technical Skills

Languages: Python, Java, JavaScript, SQL, C, C++, HTML, CSS
AI/ML: HuggingFace, LangChain, scikit-learn, Pandas, NumPy, PyTorch (basic), NLP, CNN, Random Forest, Survival Analysis
Backend: Spring Boot, Spring, FastAPI, REST APIs, JDBC, Microservices
Tools: MLflow, Docker (basic), Git, GitHub, GitHub Actions
Other: RAG Pipelines, ChromaDB, Blockchain, Data Structures, OOP

Education

B.Tech in Computer Science	2021 – 2025
Graphic Era University, Dehradun	
CGPA: 7.55 / 10	
Class XII (ICSE)	2021
St. Joseph’s Academy, Dehradun	
83.5%	
Class X (ICSE)	2019
St. Joseph’s Academy, Dehradun	
90.16%	

Certifications

- Oracle Cloud Infrastructure Data Science Professional (2025)
- Microsoft Career Essentials in Generative AI
- J.P. Morgan Software Engineering Virtual Experience
- Accenture Data Analytics Virtual Experience
- Deloitte Data Analyst Virtual Experience
- TCS iON Young Professional Program
- Yale University: The Science of Well-Being
