Professional Summary

AI/ML Engineer and Software Developer with hands-on experience in NLP, computer vision, survival analysis, RAG-based LLM systems, and backend engineering. Skilled in building scalable REST APIs, deploying machine learning pipelines, developing GenAI applications, and optimizing production systems. Strong foundation in machine learning, deep learning, backend development, and MLOps workflows with practical experience across AI-driven and full-stack software systems.

Experience

Assistant Software Engineer

July 2025 – Present

UPCL (via Infinite Sols), Dehradun

- Debugged and optimized Java REST APIs and backend microservices for power utility systems
- Worked on relational databases including query optimization, indexing, and schema updates
- Developed unit and integration tests for backend reliability
- Collaborated in Agile development teams to deliver production features

Java Intern

July 2024 – August 2024

IDS Infotech Ltd, Chandigarh

- Developed enterprise backend modules using Java, JDBC, and OOP principles
- Delivered sprint-based features within Agile workflows

Projects

PatchFlow — Enterprise Patch Workflow Platform

Spring Boot 3, React, PostgreSQL, Docker

- Architected full-stack deployment governance platform with 6-role RBAC and 11-state workflow engine
- Implemented immutable audit logging, Kanban tracking, and soft-delete compliance across REST API modules

Customer Churn Prediction using Survival Analysis

Python, scikit-learn, Cox PH

- Built end-to-end ML pipeline using Random Forest and Cox Proportional Hazards model
- Achieved 77.36% accuracy, 0.84 ROC-AUC, and 0.966 concordance index
- Performed feature engineering, preprocessing, and survival modeling

PDF RAG Chatbot

LangChain, HuggingFace, ChromaDB

- Built Retrieval-Augmented Generation system for querying PDF documents
- Implemented embeddings, vector search, chunking, and source-aware responses
- Deployed conversational interface on HuggingFace Spaces

Crop Disease Detection

PyTorch, CNN, FastAPI, MLflow

- Trained CNN model on 50K+ plant disease images across 38+ classes
- Achieved approximately 88% classification accuracy
- Built FastAPI inference backend with MLflow experiment tracking

NLP Chatbot

Transformers, NLP, Python

- Developed transformer-based chatbot with context-aware intent classification
- Achieved sub-500ms inference latency

Object Detection System

YOLO, OpenCV

- Implemented real-time object detection pipeline using YOLO and OpenCV
- Supported image and video-stream inference workflows

Stock Market Prediction

LSTM, PyTorch

- Built LSTM-based stock market forecasting model evaluated using RMSE

Blockchain Voting System

Solidity, Web3

- Developed decentralized blockchain voting platform using Solidity smart contracts

Technical Skills

Languages: Python, Java, JavaScript, SQL, C, C++, HTML, CSS
AI / ML: HuggingFace, LangChain, scikit-learn, Pandas, NumPy, PyTorch, NLP, CNN, LSTM, Random Forest, Survival Analysis, RAG Pipelines, ChromaDB
Backend Development: Spring Boot, Spring Framework, FastAPI, REST APIs, JDBC, Microservices
Tools: MLflow, Docker (basic), Git, GitHub, GitHub Actions
Core CS: Data Structures, OOP, DBMS, Operating Systems, Computer Networks

Education

B.Tech in Computer Science	2021 – 2025
<i>Graphic Era University, Dehradun</i>	<i>CGPA: 7.55 / 10</i>
Class XII (ICSE)	2021
<i>St. Joseph's Academy, Dehradun</i>	<i>83.5%</i>
Class X (ICSE)	2019
<i>St. Joseph's Academy, Dehradun</i>	<i>90.16%</i>

Certifications

- Oracle Cloud Infrastructure Data Science Professional (2025)
- Microsoft Career Essentials in Generative AI
- J.P. Morgan Software Engineering Virtual Experience
- Accenture Data Analytics Virtual Experience
- Deloitte Data Analyst Virtual Experience
- TCS iON Young Professional Program
- Yale University: The Science of Well-Being
