Professional Summary

B.Tech Computer Science graduate (2025) with approximately 1 year of experience in Java backend engineering and hands-on expertise in AI/ML including NLP, computer vision, survival analysis, and RAG-based LLM applications. Experienced in building REST APIs, debugging production systems, and developing end-to-end ML pipelines. Currently focused on AI Engineering, GenAI systems, and MLOps workflows.

Experience

Assistant Software Engineer

July 2025 – Present

Infinite Solutions, Dehradun

- Debugged and optimized production Java REST APIs and microservices supporting power utility operations
- Reduced ticket resolution time through root cause analysis and improved test coverage
- Managed relational databases including query optimization, schema updates, and indexing
- Developed unit and integration tests ensuring API reliability
- Collaborated in Agile teams to deliver backend features

Java Intern

July 2024 – August 2024

IDS Infotech Ltd, Chandigarh

- Developed backend modules in Java within enterprise codebase
- Applied OOP and JDBC concepts in production-level applications
- Delivered features within sprint timelines

Projects

PatchFlow — Enterprise Patch Workflow Platform

Spring Boot 3, React, PostgreSQL, Docker

- Architected full-stack deployment governance platform with 6-role RBAC and 11-state workflow engine
- Implemented immutable audit logging, Kanban tracking, and soft-delete compliance across REST API modules

Customer Churn Prediction (ML + Survival Analysis)

Python, Random Forest, Cox PH

- Built end-to-end churn prediction using Random Forest and Cox PH model
- Achieved 77.36% accuracy, 0.84 ROC-AUC, 0.966 concordance index

PDF Summarization + RAG Chatbot

LangChain, HuggingFace, ChromaDB

- Built NLP pipeline using HuggingFace and LangChain
- Implemented vector search with source-cited responses
- Deployed on HuggingFace Spaces

Crop Disease Detection

CNN, FastAPI, MLflow

- Trained CNN model on 50K+ images across 38+ classes with approximately 88% accuracy
- Built FastAPI inference service and MLflow experiment tracking

NLP Chatbot

Transformers, NLP

- Built transformer-based intent classification system with context-aware responses
- Achieved sub-500ms latency

Stock Market Prediction

LSTM, Time Series

- Built LSTM-based stock prediction model evaluated using RMSE

To-Do List API

Spring Boot, Swagger

- Built REST API with validation and Swagger/OpenAPI documentation

Blockchain Voting System

Solidity, Web3

- Developed decentralized voting system using Solidity and Web3

Object Detection

YOLO, OpenCV

Implemented real-time object detection using YOLO and OpenCV

Technical Skills

Languages: Python, Java, JavaScript, SQL, C, C++, HTML, CSS

AI / ML: HuggingFace, LangChain, scikit-learn, Pandas, NumPy, PyTorch (basic), NLP, CNN, Random Forest, Survival Analysis

Backend: Spring Boot, Spring Framework, FastAPI, REST APIs, JDBC, Microservices

Tools: MLflow, Docker (basic), Git, GitHub, GitHub Actions

Other: RAG Pipelines, ChromaDB, Blockchain, Data Structures, OOP

Education

B.Tech in Computer Science	2021 – 2025
<i>Graphic Era University, Dehradun</i>	<i>CGPA: 7.55 / 10</i>
Class XII (ICSE)	2021
<i>St. Joseph's Academy, Dehradun</i>	<i>83.5%</i>
Class X (ICSE)	2019
<i>St. Joseph's Academy, Dehradun</i>	<i>90.16%</i>

Certifications

- Oracle Cloud Infrastructure Data Science Professional (2025)
- Microsoft Career Essentials in Generative AI
- J.P. Morgan Software Engineering Virtual Experience
- Accenture Data Analytics Virtual Experience
- Deloitte Data Analyst Virtual Experience
- TCS iON Young Professional Program
- Yale University: The Science of Well-Being
